

TECHNICAL BULLETIN

Design Considerations

Virginia Glass Products Corporation furnishes quotations for, and upon receipt of a written purchase order, glass and accessory hardware as requested by the customer. Virginia Glass Products Corporation is not selling a pre-packaged system; we make no warranty that materials are fit for any particular purpose or use and no other warranty, expressed or implied. Design criteria such as integrity, strength, thermal movement, air infiltration, static pressure, and other structural considerations are the sole responsibility of the customer, glazing contractor, structural engineer, and/or architect.

Although we will offer as much assistance as possible, our involvement must be understood as informal and limited to providing information for the customer's review and final approval by the structural engineer, architect, or other design professional.
